

BookEx Design Documents

1. Design Document - System Architecture Diagram

This design view groups the implementation into browser, routing, application, presentation, persistence, SQLite, and static/upload concerns.

System Architecture Diagram

bookEx Django web application

Generated from repository structure and source code review

Figure: 1. Design Document - System Architecture Diagram

2. Design Document - Component Diagram

This design component diagram emphasizes deployment-oriented responsibilities across client, web, application, data access, and data tiers.

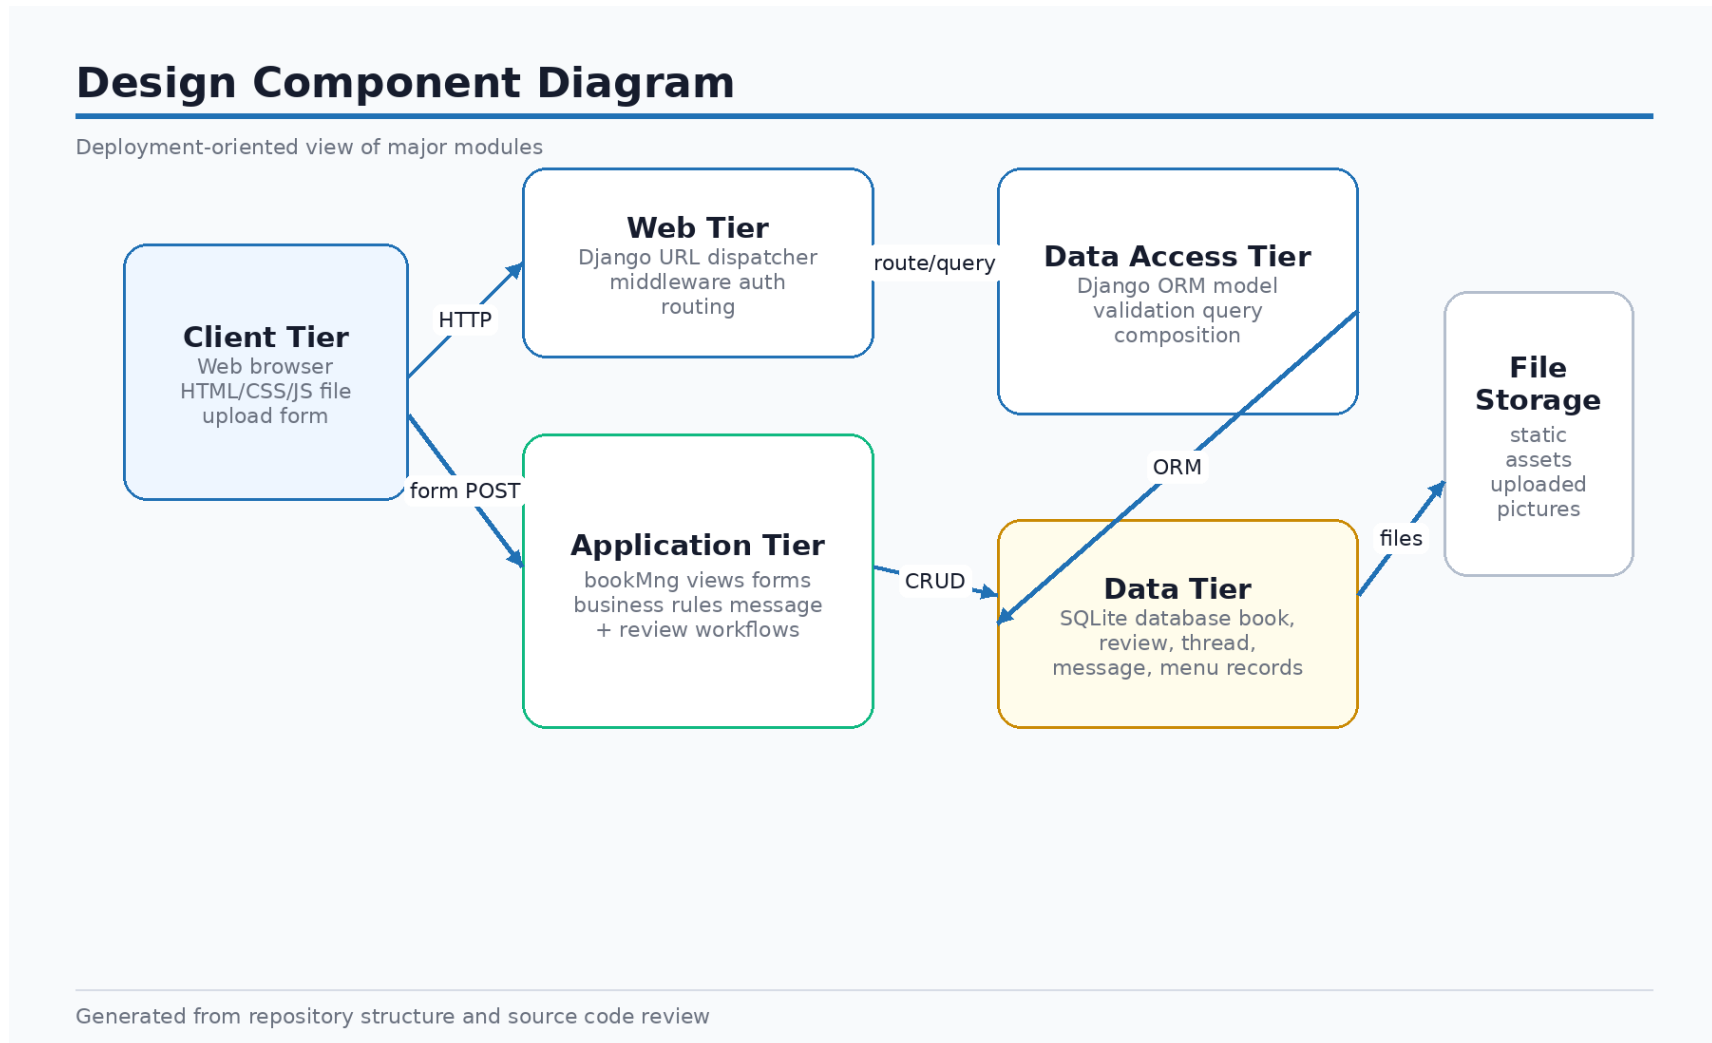

Figure: 2. Design Document - Component Diagram

3. Design Document - Interaction Overview Diagram

The interaction overview presents a condensed request/response sequence spanning the browser, views, ORM/models, and database.

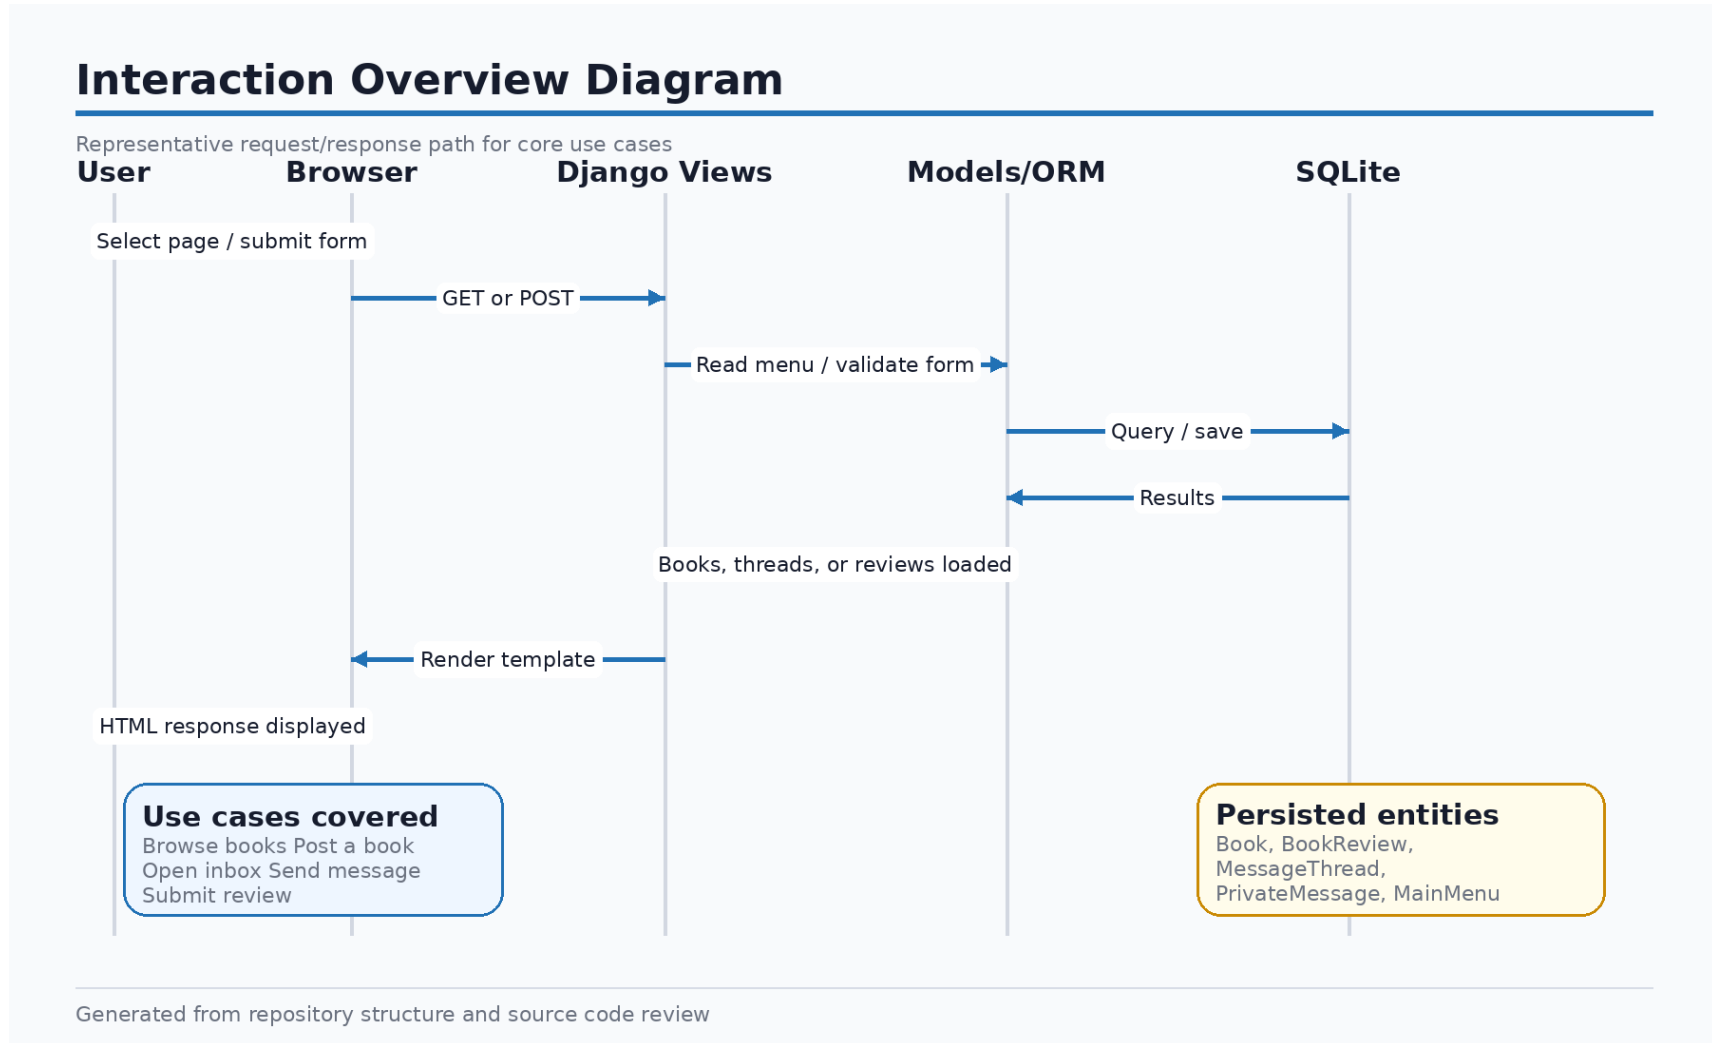

Figure: 3. Design Document - Interaction Overview Diagram

4. Design Document - Flowchart

This flowchart models the review submission logic implemented in the repository, including validation, update-or-create behavior, and redirect.
